## ***Inbound Logistics* Selects InMotion Global as a Top 100 Logistics IT Provider for Fifth Consecutive Year**

### **InMotion Global TMS® continues to redefine logistics technology for shippers with their free TMS system - and now with QuoteMyTruckload.com**

Saint Petersburg, FL – May 8, 2013

*Inbound Logistics* magazine has again ranked InMotion Global TMS®, a division of Interstate Logistics Group, on its list of top IT providers in recognition of its leadership in the Logistics Technology market.

InMotion Global's innovative suite of free software solutions, which now includes the much praised QuoteMyTruckload.com service as well as the free InMotion Global TMS™ system, enables shippers to control their entire logistics operations with comprehensive, free, and easy-to-use software products. The company's Transportation Management System (TMS) has won numerous awards over the years, including *Food Logistics Magazine's* Top 100 Software and Technology Providers award.

InMotion Global TMS® is the leading web-based, fully-hosted Transportation Management System. InMotion Global's patent-pending technology allows shippers to manage every aspect of their logistics, transportation, and distribution functions while providing complete freight movement visibility. The cloud-based Enterprise version offers a complete lane bid management module, multi-node data replication, cross browser compatibility, mobile device compatibility, and order management, as well as a full suite of transportation and distribution management functions.

Tim Higham, President and CEO of InMotion Global, stated, "Winning this award for five years in a row is extremely gratifying. *Inbound Logistics* is one of the most prestigious industry publications so this means everything to our team and to our clients. As an industry leader in logistics technology solutions, we've created a free TMS that provides the agility and simplicity of implementation that shippers demand to manage the most complex shipping operations. In addition to our Enterprise version, we have seen our Lite version explode with new shippers. Both are still free. Companies are very concerned with keeping costs down and InMotion Global offers a complete TMS solution that eliminates cost concerns."

In addition, InMotion Global separated the rating and quoting module built within InMotion Global TMS™ as a stand-alone service. Higham stated, "The brand new QuoteMyTruckload.com service is aimed at smaller shippers who occasionally ship a truckload and need a fast and accurate truckload quote and a qualified truck and driver to move it. Our shippers told us that they wanted to automate the laborious quoting and booking process so, as a result, we built QuoteMyTruckload.com. The best part is that we all save time, money and energy by uniquely leveraging our patent-pending technology."

#### **About InMotion Global, Inc.**

InMotion Global, Inc. provides the industry-leading and patent-pending Transportation Management System, Ascend TMS™ with its companion web-based load tracking portal LoadLink™ to thousands of shippers, 3PL's and asset carriers in 19 different countries across the United States.
