AscendTMS Includes Complete Carrier Verification, Driver Qualification and Fraud Warning Detection As Part Of Their Leading TMS Software

Carrier Verification, Driver Qualification, Carrier Onboarding and Fraud Warning Detection Are All Included As Part Of The Freight Movement Process

Tampa, FL – January 3rd, 2017

InMotion Global, Inc. announced today that AscendTMS, the world's most popular transportation management software (TMS), has added free Carrier Verification, Driver Qualification, Carrier Onboarding and Fraud Warning Detection for carriers, freight brokers, and freight shippers to its comprehensive TMS software feature set. AscendTMS is the only TMS on the market to offer free, real-time, driver fraud warning detection, carrier verification and onboarding.

Tim Higham, president and CEO of InMotion Global, Inc. said, "Putting cargo on a third party truck requires trust. However, as Ronald Reagan so famously said, 'Trust yet verify'. Our newly included carrier verification and fraud warning detection features allow all participants in the freight movement process to verify and qualify those involved. This allows for the mitigation of fraud, it minimizes cargo claims, and it dramatically increases customer satisfaction."

This new AscendTMS service is natively built into their industry leading TMS software. Carrier onboarding and verification is fully automated, and all qualification data is pulled in real-time. AscendTMS users get the benefit of the latest fraud alerts and warnings so they make sure they are loading only the safest and best drivers and carriers.

In addition to the new credit reporting features, AscendTMS is the only TMS to offer seamless cash funding on completed loads, it offers fully customizable load management screens, free GPS load tracking built into the TMS, free document management, sending of drivers instructions via text from the TMS (and the ability to receive texted replies into the TMS), complete fleet, asset, and driver management, IFTA tax reporting, full brokerage management, easy accounting, full reporting, user role management, branch and agent management, a free truckload rate index, a free driver pay and settlement module, free route and load optimization, free customization, EDI connectivity, a driver payment portal, and much more.

Higham continued, “AscendTMS is the undisputed leader in TMS value, offering more features for less money than any other TMS in the world. AscendTMS is the only TMS software provider to offer carrier verification and fraud warnings as an included service. I believe that’s the pure definition of value for our customers, who are looking for the best available TMS technology at the absolute lowest cost.”

AscendTMS continues to be the only transportation management system (TMS) offered at no cost for the base system, and is the only TMS that can be launched immediately from a website by new users with no downloads, no setup, no contract, no upfront fees, no credit card, and no long-term license agreement. AscendTMS continues to be the world’s leading cloud based freight brokerage software, trucking software, and shipping software and has won every major industry award over the last 14 years.

About InMotion Global: InMotion Global, Inc. provides the free, award-winning, patent-pending Transportation Management System, AscendTMS®, to freight shippers, freight brokers, and trucking companies.
