AscendTMS™ Announces Document Processing By Text Message – An Industry First

Drivers Text Load Documents From The Field Into AscendTMS™. No App needed.

Brandon, FL – February 15, 2016

InMotion Global, Inc. today announced that it has released yet another industry first with its latest release of Document Processing and Management; *the ability to get incoming load documents via text message*. It allows AscendTMS™ users to request that their drivers text in their POD and load document images from the field. The texted images are automatically appended to the correct load within AscendTMS™ in real-time.

Tim Higham, president and CEO of InMotion Global said; “Getting the driver paperwork in, from the field, is key to getting paid faster. AscendTMS™ now lets a driver text his paperwork in while on the road and we attach it to the right load for the AscendTMS™ user. This means that signed load paperwork arrives in the office in seconds, not days or weeks. This means everyone gets paid faster”.

AscendTMS™ has become the go-to TMS system in terms of freight brokerage software, trucking software and freight shipping software. All updates and new features are released for free to premium users every 2 weeks. Moreover, all new feature ideas requested by users are written for free as long as the entire user community benefits from the new idea.

Higham continued; “This is a true industry first. No other TMS in the world does this. The driver does not need any phone app to install and it is totally free to use. AscendTMS™ simply sends the driver a request for his paperwork via a special text message. They snap a picture of the paperwork and simply reply to the text message. AscendTMS™ does the rest and the load document is in front of the AscendTMS™ user in seconds. Everyone gets paid faster and our users have an organized, paperless, office. This is truly revolutionary.”

AscendTMS™ continues to be the only transportation management system (TMS) offered at no cost for the base system, it’s the only enterprise level TMS that can be launched immediately from a website by new users, and it’s the only TMS offering requiring no contract, no upfront fees, and no long-term license agreement. AscendTMS™ continues to be the world’s leading cloud based freight

brokerage software, trucking software, and shipping software, and has won every major industry award over the last 14 years.

About InMotion Global: InMotion Global, Inc. provides the free, award-winning, patent-pending Transportation Management System, AscendTMS®, to freight shippers, freight brokers, and trucking companies. AscendTMS® is used by thousands of companies in 19 countries, from small single-person logistics operations to multi-billion dollar international corporations, to manage any logistics operation.
